Tolstov, Yu. P.
IMPAIRMENT OF HEARING AND VESTIBULAR
FUNCTION IN BRUCELLOSIS. [1962] [8]p. 30 refs.
Order from OTS or SLA \$1. 10 62-23572

I. Tolstov, Yu. P.
II. Translations, New York

Trans. of Vestnik Oto-Rino-Laring[ologii] (USSR)
1959, v. 21 [Nov/Dec] p. 24-29.

DESCRIPTORS: *Hearing, Ear, *Brucellosis, In-
flammation, Nervous system.

The auditory analyzer is involved in 29% of brucellosis cases. Involvement of the external and middle ear was found in 3% of our cases. Inflammation of the middle ear, developing against a background of brucellosis, provides a semblance of intracranial complications, which may lead to errors in diagnosis. The most serious pathology is the involvement of the cochlear portion of the inner ear, seen by us in 25% of our cases. Disturbance of vestibular function was found in 8% of our cases, manifested primarily in a slight depression of function. (Author)

Order from OTS or SLA \$1.10 62-23381

Trans. of Vestnik Oto-Rino-Laring[ologii] (USSR)
1960, v. 22 [May/June] p. 27-33.

DESCRIPTORS: *Streptomycin. *Ear. *Toxicity,
*Analyzers(Psychology). Nystagmus, Hearing.

Streptomycin may have a toxic effect on the vestibular
analyzer: after prolonged injection into dogs we find
either a shortening or a complete extinction of the
period of postrotational nystagmus, depending upon the
total quantity of drug administered. Bilateral impair-
ment of function of the vestibular analyzer is specific
for toxic doses of streptomycin under these conditions.
The curting out of the function of the vestibular appara-
(Biological Sciences--Pathology, TT, v. 8, no. 3(over))
